

## **RISK ASSESSMENT FOR – Grippped Schools Risk Assessments**

**SUBJECT: Grippped Schools Risk Assessment**

**Assessment Dates: 2025**

**This risk assessment has been written for the activities provided by Grippped West London and can be used to assist you in writing your own Risk Assessment for your upcoming trip. This generic assessment covers the site risks, but does not assess the specific requirements, abilities, medical or physical abilities of your group. We would encourage the group organiser to visit Grippped to undertake your own assessment; this can be prebooked via our contact Centre.**

- **The Escapade Group does not accept liability for any omissions to this list.**
- **The control measures indicated are recommendations only and must be adapted / amended by group organisers.**
- **Please ensure adequate supervisors are appointed for the number in your group.**
- **Areas of the attraction's grounds do feature water; children or students must be accompanied by group leader at all times during the visit.**
- **Supervision is required at all times and there is strictly no climbing on the barriers / fencing or trees**
- **At Grippped, there are many uneven surfaces and staircases of various widths, so care must be taken when moving around the site**
- **Guests must use handrails where provided and running must be discouraged when moving around the site.**
- **Some attractions may not be suitable for children or those of a nervous disposition.**
- **Group leaders are responsible for ensuring all supervising adults are competent and understand their roles. Plan and use suitable group control measures (for example, buddy systems, large group split into smaller groups each with named leaders, identification systems). Discuss the itinerary and arrangements prior to arrival / departure points.**

## RISK ASSESSMENT FOR – Grippled Schools Risk Assessments

Risk Matrix								
Risk rating guidance	Likelihood (L)	5	5	10	15	20	25	Likelihood (L) x Severity (S) = Risk Rating (RR).
		4	4	8	12	16	20	
		3	3	6	9	12	15	
		2	2	4	6	8	10	
		1	1	2	3	4	5	
			1	2	3	4	5	
		Severity (S)						
Acceptability of risk guidance	High-risk: 15 – 25		High-risk activities should cease immediately. Further effective control measures to mitigate risks must be introduced.					
	Medium-risk: 8 – 12		Medium-risks are an acceptable level based on the reduced likelihood after sufficient control measures are implemented					
	Low-risk: 1-6		Low-risks are largely acceptable. Where it is reasonable to do so, efforts should be made to reduce risks further.					
Guidance. When completing a risk assessment, you should:	<ol style="list-style-type: none"><li>1. Identify the persons at risk and the significant hazards.</li><li>2. Calculate an initial RR for the activity.</li><li>3. Identify risk control measures that reduce the risks to an acceptable level.</li><li>4. Calculate a revised RR - you should consider how much safer the task will be if the control measures are followed. Here, you should consider changing both the likelihood (L) and the severity (S) ratings.</li></ol>							
<b>Note.</b> Ideally, you should look to reduce the risks so that the task can be classified as “low-risk”.								
The total risk scores are a multiplication factor of the calculated Likelihood and Severity. Both Likelihood and Severity are given a number between 1 - 5 as shown on the matrix below and these two numbers are then multiplied together to give the total risk score. Total risk scores can be divided in both directions, i.e. a total risk score of 12 could be a Likelihood (3) x Severity (4) or Likelihood (4) x Severity (3).								

## RISK ASSESSMENT FOR – Grippped Schools Risk Assessments

Likelihood	Definition	Points rating
Very High	Very High probability if the situation is not addressed an accident is almost certain.	5
High	High probability of an accident is probable without any added factor	4
Moderate	Moderate probability an incident is foreseeable.	3
Low	Some probability requires a combination of factors to take place.	2
Very Low	No significant probability; lightning strike, freak accident.	1

Severity	Definition	Points rating
Very High	Severe injury involving a potentially life-changing injury or fatality	5
High	Serious injuries including concussions or fractures of long bones	4
Moderate	Injury requiring medical intervention e.g. cuts requiring stitches	3
Low	Minor injury, laceration or bruising requiring first aid only	2
Very Low	No injury likely e.g. damaged or soiled clothing, minor bruising, grazes	1

## RISK ASSESSMENT FOR – Gripped Schools Risk Assessments

### Bag Jump

HAZARD	L	S	IRR	WHO MIGHT BE HARMED	CONTROL MEASURES	FURTHER CONTROL MEASURES:	L	S	RR
Injury from missing the bag, falling incorrectly or bypassing lower jump tower platforms and going straight to higher platforms	3	4	12	Participants  Physical injuries by falling to the ground or impacting a hard surface such as the jump platform due to incorrect jump technique	<p>The activity is run by fully qualified and experienced instructors.</p> <p>Participants will receive a safety briefing and demonstration from the instructor before being allowed to jump.</p> <p>Participant's responsible adults are required to read and sign a waiver before the participant is allowed to jump, so they are aware of the potential risk; even when jumping with the correct technique there is still possibility of injury.</p> <p>Safety rules will be displayed at the entrance to the bag jump area.</p> <p>Bags are large enough to allow for margin for error.</p> <p>Participants will be required to carry out jumps on the lowest platforms before being allowed to progress to higher platforms. In the event of jumpers not meeting the required standard, they will not be allowed to progress to higher jumps.</p> <p>Bags are tethered as per manufacturer instructions to ensure the bags do not move away from the base of the tower.</p> <p>Bags installed on flat level ground.</p>	<p>Group Leaders to ensure that children stay together within their groups.</p> <p>Group Leader to brief students on acceptable behaviour for safety</p> <p>All group organisers should undertake their own risk assessment for the visit</p>	2	4	8

## RISK ASSESSMENT FOR – Gripped Schools Risk Assessments

					An emergency procedure is written, in place and regularly practised to ensure guests can be assessed and treated without worsening their condition.				
Head impacting on platform edge or platform structure	3	4	12	Participants  Participants sustaining head injuries or injuries to their spine by impacting on the jump platform.	The activity is run by fully qualified and experienced instructors.  Participants will receive a safety briefing and demonstration from the instructor before being allowed to jump, only when participant are able to demonstrate the correct technique are they allowed to progress, or experience ended if correct technique cannot be demonstrated.  Participants are never pushed or made to jump; jumps need to be performed by the participant's own free will, when they are composed to jump.  Participants are instructed to jump by standing at the edge of the platform, or by standing at the back of the platform and walking forward to gain momentum both techniques result in participants jumping clear of the platform.  Multi-Level jumps platforms to allow safe progression to higher levels.	Group Leader to brief students on acceptable behaviour for safety.  All group organisers should undertake their own risk assessment for the visit.	2	4	8
Unexpected deflation of the bag	3	4	12	Participants  Physical injuries such as broken bones or life-changing injuries from	Daily equipment checks are carried out as per manufacturer instruction; in the event of equipment failing, these checks, the equipment will be quarantined, and attraction not used.  Annual external RPII inspection of bags.	Group Leader to brief students on acceptable behaviour for safety.  All group organisers should undertake their own risk assessment for the visit.	2	4	8

## RISK ASSESSMENT FOR – Gripped Schools Risk Assessments

				falling onto the ground or impacting a hard surface	Power interruption deflation alarms have been fitted to the power supply or each power fan. A battery backup power supply monitor has been fitted to the main power supply. Alarm and Strobe lights fitted to tower platform to alert instructors so they can stop jumpers until clarification of blower working. Power Supply alarms will be tested in daily checks.  Sharp objects are kept away from the bags. Jumpers and instructors will be required to remove personal items from their pockets prior to jumping. Participants will be checked prior to jumping.				
Impact between participants or team members	3	3	9	Participants  Physical injuries such as broken bones from the impacting with another guest or instructor	The jump landing area is fenced to prevent unauthorised access. Only authorised instructors and the jumper to be in the landing area.  Only one jumper per bag at any one time  Jumpers are instructed when to jump by the instructor. Signal / verbal instructions on when to jump communicated to jumpers before the jump.  Safety rules are displayed at the entrance to jump the lowest jump platform.  Platform exit gates are closed and locked with combination lock whenever the instructor leaves the gate.	Group leaders are responsible for ensuring adequate supervision is provided at all times.  Group Leader to brief students on acceptable behaviour for safety.  All group organisers should undertake their own risk assessment for the visit.	2	3	6

## RISK ASSESSMENT FOR – Gripped Schools Risk Assessments

					One way system in place briefed to participants during briefing, jump and exit; no climbing from the bags back on to the jump platforms.				
Blower not operating correctly – not enough air pressure / too much air pressure	3	4	12	Participants  Physical injuries from hitting hard ground due to bag failure	Air pressure is set by the manufacturer. Instructors trained that they are not permitted to make changes to the operating pressures ranges; they must maintain the safe operating range set out by the manufacture or the attraction is closed.  Daily pressure checks as part of daily checks  Pressure release values are checked to ensure they are operating correctly as per manufacturer instructions.  Power interruption deflation alarms have been fitted to the power supply or each power fan. A battery backup power supply monitor has been fitted to the main power supply. Alarm and Strobe lights fitted to tower platform to alert instructors so they can stop jumpers until clarification of blower working. Power Supply alarms will be tested in daily checks.  All blowers must be fully operational for the attraction to be opened. The number of blowers has been specified by the manufacture based on the calculations for jump height and participant weight.		2	4	8

## RISK ASSESSMENT FOR – Gripped Schools Risk Assessments

Weather – Windy condition bag blowing away	4	4	16	<p>Participants</p> <p>Participants sustaining life changing injuries following the bag becoming untethered and blowing away.</p>	<p>The bag will be anchored to anchor points able to withstand the force of min 150kg as set out in the manufacturer's manual. Load testing is carried out as part of ADIPS inspection.</p> <p>Anchor points and tether straps will be checked as part of the daily and operational checks. Broken or damaged tethers will be replaced.</p> <p>Bags are not used if the wind exceeds 24mph. Anemometer onsite – top of towers and one ground level to allow wind speed to be checked.</p> <p>If wind speeds exceed 24 mph ,jump bags will be stowed to protect them from wind damage</p>		2	4	8
Slips, trips and falls on tower	3	3	9	<p>Participants</p> <p>The above group falling on the stairs or platforms and sustaining injuries such as broken bones.</p>	<p>Daily checks on ground conditions and pathways around the bags to identify slip and trip hazards. Repairs are carried out to rectify issues.</p> <p>Participants must be wearing flat, close toed shoes when participating in any Gripped activities.</p> <p>Participants must walk not run up the stairs and hold on to the handrail when ascending or descending</p> <p>Tower steps and platforms built with non-slip grips.</p> <p>Tower steps and platforms were monitored for the build-up of algae. Platforms and steps are cleaned if the buildup is identified.</p> <p>Participants and team briefed to walk, not run, up steps to towers.</p>	<p>Group leaders are responsible for ensuring adequate supervision is provided at all times.</p> <p>Group Leader to brief students on acceptable behaviour for safety.</p> <p>All group organisers should undertake their own risk assessment for the visit.</p>	2	3	6

## RISK ASSESSMENT FOR – Gripped Schools Risk Assessments

					<p>Tower regularly checked for loose stones from surrounding pathways being caught in non-slip grooves.</p> <p>Platforms swept daily to remove any loose stones.</p>				
Falling objects from towers platforms above	3	3	9	<p>Participants</p> <p>Participants sustaining head injuries after being struck by falling objects.</p>	<p>Participants are instructed to leave all loose items on the ground.</p> <p>Platform checked as part of daily checks to identify loose items which have either been placed on the towers or parts of towers which may have come loose or broken.</p> <p>No maintenance works to take place at height above the bags whilst the bag jump is in use.</p> <p>Platforms swept daily to remove any loose stones to prevent from falling.</p>	<p>Group leaders are responsible for ensuring adequate supervision is provided at all times.</p> <p>Group Leader to brief students on acceptable behaviour for safety.</p> <p>All group organisers should undertake their own risk assessment for the visit.</p>	2	3	6
Disagreement on participant suitability	3	3	9	<p>Participants</p> <p>Sustaining injuries due to not being able to understand the safety requirement for the attraction.</p>	<p>Participants must be always supervised by their accompanied adults; ratios of adults to children must be adhered to.</p> <p>Guests with additional needs must be able to understand the instructor's safety briefing; if there is any doubt about suitability to participate, the instructor will call the manager to assist in assessing suitability.</p> <p>Anyone who is deemed unable to understand the briefing will be excluded from participation. Instructors are authorised to stop the session if participants are misbehaving.</p>	<p>Group leaders are responsible for ensuring adequate supervision is provided at all times.</p> <p>Group leaders must read participant criteria and ensure that all participants within their party are suitable to participate in the activity.</p> <p>Group Leader to brief students on acceptable behaviour for safety.</p>	2	3	6

## RISK ASSESSMENT FOR – Gripped Schools Risk Assessments

				Anyone suspected of being under influence of alcohol or drugs is excluded from participating. Participants must be able to access the tower platforms without the need for being carried. Participants must not carry children or babies in their arms.	All group organisers should undertake their own risk assessment for the visit			
--	--	--	--	--	---	--	--	--

### Extreme Slides

HAZARD	L	S	IRR	WHO MIGHT BE HARMED	CONTROL MEASURES	FURTHER CONTROL MEASURES:	L	S	RR
Falls from height	3	4	12	Participants  Participants sustaining a life changing injury due to a fall from height	Participants are given a full safety brief before participating in the activity.  Slides are fully enclosed at the top. Slides can only be accessed from the Towers which are locked when not in operation.  Access to the slides is via a fenced staircase fitted with anti-climb netting.  Children will be supervised by their accompanying adults.	Group leaders are responsible for ensuring adequate supervision is provided at all times.  Group Leader to brief students on acceptable behaviour for safety.  All group organisers should undertake their own risk assessment for the visit.	2	4	8
Impact Injuries – Participants impacting the slides or each other.	3	3	9	Participants  Participants impacting the slide or other persons. Leading to injuries, head injuries, bruises, or broken bones	Slides are operated as a supervised activity. Participant's responsible adults are required to read and sign a waiver so they fully understand what is required of them to keep themselves safe.  Participants wear helmets and are contained within a sliding sack when using the slides.	Group leaders are responsible for ensuring adequate supervision is provided at all times.  Group Leader to brief students on acceptable behaviour for safety.  All group organisers should undertake their own risk assessment for the visit.	2	3	6

## RISK ASSESSMENT FOR – Gripped Schools Risk Assessments

					Only one participant per slide. The ground crew will monitor the bottom of slides to ensure the previous participant has exit the slide prior to the next participant being sent down. The ground crew will ensure that no one attempts to climb the slide.				
Participants using their arms or legs to stop or slow themselves in the process of sliding	3	4	12	Participants  Participants sustaining injuries including broken bones by using arms or legs to slow or stop themselves.	Participants are given a mandatory safety briefing prior to using the slides, this includes instructions on how to slide and not to use arms or legs to brake or slow themselves down.  Participant’s responsible adults are required to read and sign a waiver prior to participating in the activity to inform them of the risks and advise on restrictions for not participating.  Participants slide in a slide sack to contain their legs; participants are instructed to hold on to the top of the slide sack to reduce the likelihood of reaching out.	Group Leader to brief students on acceptable behaviour for safety.  All group organisers should undertake their own risk assessment for the visit.	2	4	8
Puncture wounds/cuts due to sharp objects in participants’ pockets or sharp edges on slides	3	3	9	Participants  Participants receiving injuries due to sharp items on them when using the slides or from sharp surfaces on the slides	Participants asked to remove any sharp items as part of the safety brief before using the slides – Hairpins, badges, shoes, phones.  Daily slide inspections are carried out to identify any sharp edges or surfaces. In the event of sharp areas being identified, the slide will be quarantined until the issue is resolved.	Group Leader to brief students on acceptable behaviour for safety.  All group organisers should undertake their own risk assessment for the visit.	2	3	6

## RISK ASSESSMENT FOR – Gripped Schools Risk Assessments

Friction burns and injuries from the incorrect use of slides	<b>3</b>	<b>2</b>	<b>6</b>	<p>Participants</p> <p>Participants sustain friction burns whilst using the slides or sliding equipment.</p>	<p>Guests are contained within a sack and briefed on how to slide correctly. Guests are instructed not to remove themselves from the sack.</p> <p>Guests wear helmets to protect their heads.</p> <p>Guests are encouraged to wear long sleeve tops when using the slides; this is not mandatory as the guest will be in the sliding sack.</p>	<p>Group Leader to brief students on acceptable behaviour for safety.</p> <p>All group organisers should undertake their own risk assessment for the visit.</p>	<b>1</b>	<b>3</b>	<b>3</b>
Participants getting stuck in the slide or running out short	<b>2</b>	<b>3</b>	<b>6</b>	<p>Participants</p> <p>Participants being injured by while stuck or not exiting the slide before next participant uses slide. Broken bones due to impact injuries</p>	<p>Slide will be monitored where guests are landing in the RAG to ascertain if the slides are operating differently.</p> <p>The top slide operator will not send the next participant down the slide until they have received the ground crew signal that the slide has been cleared. If the top person does not see the signal, they will radio to check that the slide has been exited.</p>	<p>Group Leader to brief students on acceptable behaviour for safety.</p> <p>All group organisers should undertake their own risk assessment for the visit.</p>	<b>1</b>	<b>3</b>	<b>3</b>

## RISK ASSESSMENT FOR – Gripped Schools Risk Assessments

### High Ropes

HAZARD	L	S	IRR	WHO MIGHT BE HARMED	CONTROL MEASURES	FURTHER CONTROL MEASURES:	L	S	RR
<p>Falling to the ground, onto another person, onto another part of the course or another object due to:</p> <p>Users deliberately remove themselves from the belay system.</p> <p>PPE failure due to incorrect selection, use or fitting.</p> <p>The user is incorrectly attached to the safety system.</p> <p>Slips and trips.</p>	4	4	16	<p>Participants</p> <p>Participants falling to the ground causing major injury or death due to the height of the ropes course</p>	<p>A continuous safety belay system is installed for guests which does not require or allow the guests to detach themselves whilst on the course.</p> <p>Instructors attach guests to the safety system at the departure gate; they are unable to detach without a key until returning to the platform. Block keys are only carried by instructors for emergency evacuation purposes.</p> <p>Participants will be required to practice their technique on the practice course before being allowed to progress on to the main course; anyone not able to reach the required standard will not be permitted to participate on the main course.</p> <p>The safety harness is a 'one size fits all' harness. This means there can be no wrong sizing of the harness. Trained instructors check course participants' harnesses are fitted correctly before participating in the activity. Checks are carried out at ground level with the final check at the point of attaching to the belay system.</p>	<p>Group leaders are responsible for ensuring adequate supervision is provided at all times.</p> <p>Group Leader to brief students on acceptable behaviour for safety.</p> <p>All group organisers should undertake their own risk assessment for the visit.</p>	3	4	12

## RISK ASSESSMENT FOR – Gripped Schools Risk Assessments

				<p>Lanyards are fitted to the harness in a loop configuration, meaning the lanyard cannot be removed which attached to the closed belay system.</p> <p>Course inspected and certified under the ADIPS scheme.</p> <p>Maximum participant weight of 120 kg. Participants will be weighed at the entrance to the attraction. Maximum weight will be displayed in the Terms and Conditions.</p> <p>No one under the influence of alcohol or drugs is not permitted to use the course.</p> <p>All guests receive a mandatory safety briefing before being allowed to use the course.</p> <p>Personal PPE is not permitted to be used by guests on the course.</p> <p>First aid supplies and a defibrillator are available onsite. Instructors will be trained as appointed persons. There will be a minimum of one First Aid at Work qualified person onsite during operational hours.</p>				
--	--	--	--	--	--	--	--	--

## RISK ASSESSMENT FOR – Grippped Schools Risk Assessments

Failure of part of the course infrastructure	3	4	12	<p>Participants</p> <p>Failure of equipment which could lead to the above persons falling to the ground or sustaining major injuries</p>	<p>All equipment, trees and structures inspected and maintained in line with manufacturers operations manuals.</p> <p>Annual tree condition survey undertaken; the written report provided any actions identified will be actioned in order of risk priority.</p>	<p>All group organisers should undertake their own risk assessment for the visit</p>	2	4	8
Falling objects	3	3	9	<p>Participants</p> <p>Spectators</p> <p>Participants Sustaining injuries such as cuts, broken bones, bruising, or head injuries if struck by falling objects</p>	<p>Participants should be briefed ahead of the trip that minimal amounts of personal items should be brought to Grippped.</p> <p>Participants are instructed to leave all loose items on the ground.</p> <p>The use of mobile phones and cameras while using the course are prohibited.</p>	<p>Group leaders are responsible for ensuring adequate supervision is provided at all times.</p> <p>Group Leader to brief students on acceptable behaviour for safety.</p> <p>All group organisers should undertake their own risk assessment for the visit.</p>	2	3	6

## RISK ASSESSMENT FOR – Gripped Schools Risk Assessments

Unauthorised access to High Ropes Courses	3	4	12	<p>Participants</p> <p>Participants gaining access to high ropes without the correct PPE the falling to the ground sustaining broken bones, life changing injuries or death</p>	<p>Participants must be always supervised by their accompanied adults; ratios of adults to children must be adhered to.</p> <p>Access doors to high ropes course will be locked when an instructor is not present.</p>	<p>Group leaders are responsible for ensuring adequate supervision is provided at all times.</p> <p>Group Leader to brief students on acceptable behaviour for safety.</p> <p>All group organisers should undertake their own risk assessment for the visit.</p>	2	4	8
<p>Impact injuries</p> <p>Course users swinging into solid objects which could be:</p> <p>Obstacles</p> <p>Landing platforms</p> <p>Guests colliding on zip line landing</p>	3	4	12	<p>Participants</p> <p>Participants sustaining injuries such as cuts, broken bones or bruises from impacting objects or obstacles</p>	<p>Mandatory safety briefing given to all participants before they are allowed to participate in the activity.</p> <p>Participants must complete the practice course, demonstrating the correct technique before being permitted to use the main course.</p> <p>Soft padding built into landing areas, but guest safety relies on the correct techniques learnt during the briefing and practice course to remain safe.</p> <p>Participants fitted with the correct PPE configuration before being allowed to participate.</p>	<p>Group Leader to brief students on acceptable behaviour for safety.</p> <p>All group organisers should undertake their own risk assessment for the visit.</p>	2	4	8

## RISK ASSESSMENT FOR – Gripped Schools Risk Assessments

<p>Participants' injury or emergency situation</p> <p>A medical emergency requiring evacuation.</p> <p>Participant freezing who require evacuation</p>	<b>3</b>	<b>3</b>	<b>9</b>	<p>Participants</p> <p>Participants physical condition being worsened in the event of an accident or incident</p>	<p>Emergency rescue plan written; the team are trained in the process.</p> <p>Rescue equipment and PPE required for the rescue are regularly checked and tested in accordance with manufacturers' recommendations.</p> <p>Terms and conditions and disclaimer states that a participant must assess their own suitability to participate in high ropes, as this is an intense activity.</p> <p>First Aid kit and defibrillator available onsite</p> <p>Participants must shout for help in the event of getting into difficulty. Ground Crew will be roaming the length of the course to provide assistance and reassurance for participants in distress.</p>	<p>Group Leader to brief students on acceptable behaviour for safety.</p> <p>All group organisers should undertake their own risk assessment for the visit.</p>	<b>2</b>	<b>3</b>	<b>6</b>
<p>Entanglement in cables, obstacles or moving parts of the course</p>	<b>3</b>	<b>4</b>	<b>12</b>	<p>Participants</p> <p>Sustaining injuries such as trapped fingers, hair entanglement or choking.</p>	<p>Mandatory safety briefing given to all participants before they are allowed to participate in the activity.</p> <p>Participants must complete the practice course, demonstrating the correct technique before being permitted to use the main course.</p> <p>Participants are required to: Tie up hair, remove jewellery, watches etc. No loose clothing (such as scarves), loose bottom trousers. This information is given during the safety brief and on the disclaimer. Instructors will carry out <b>CHECK</b> on guests before being put onto the course.</p>	<p>Group leaders are responsible for ensuring adequate supervision is provided at all times.</p> <p>Group Leader to brief students on acceptable behaviour for safety.</p> <p>All group organisers should undertake their own risk assessment for the visit.</p>	<b>2</b>	<b>4</b>	<b>12</b>

## RISK ASSESSMENT FOR – Gripped Schools Risk Assessments

					<p>Safety Rules are displayed at the entrance to the course.</p> <p>Suitable footwear (no - heels, open toes or heels)</p> <p>Participants must interact with the course as per the briefing and practice course; if participants deviate away from what they have learnt then there is a risk of injury.</p>				
Adverse weather conditions	3	3	9	Participants Sustaining an injury due to operating the attraction inappropriate weather conditions	Instructor will monitor weather conditions and make the decision to close the course assessed on the SOP. Participants must follow all instructions always given by the instructors. It may be necessary to close or postpone the activity in some cases		2	3	6
Slips, trips and falls  On course elements / platforms  Walking up to start the platform.	3	3	9	Participants  Participants sustaining injuries such as bruising or broken bones following a slip, trip or fall	<p>Participants will be wearing harnesses so the impact should be lessened.</p> <p>Participants will be wearing tight-fitting shoes that cannot fall off. The instructors will be wearing shoes with non-slip soles.</p> <p>Start platform has handrails and non-slip treads on the stairs.</p> <p>Participants must walk up the entrance / exit stairs and hold on to the handrail at all times.</p>	<p>Group leaders are responsible for ensuring adequate supervision is provided at all times.</p> <p>Group Leader to brief students on acceptable behaviour for safety</p> <p>All group organisers should undertake their own risk assessment for the visit</p>	2	3	6

## RISK ASSESSMENT FOR – Gripped Schools Risk Assessments

Insects and risk of insect bites or reactions  Wasp/nests and the Oak Processionary Moth	3	3	9	Participants  Participants being bitten of stung or reacting following contact with Oak Processionary Moth	Regular monitoring of the course to identify any pest problems, pest control will be called to deal with any issues.  The team was trained to identify Oak Processionary Moth caterpillars; assistance will be sort from an external pest control company to confirm species as there are a number of species which look similar. The team is trained to report to their manager any potential sightings.		2	3	6
Disagreement on participant suitability	3	3	9	Participants  Sustaining injuries due to not being able to understand the safety requirement for the attraction.	Participants must be always supervised by their accompanied adults, ratios of adults to children must be adhered to.  Guests with additional needs must be able to understand the instructor's safety briefing, if there is any doubt about suitability to participate, the instructor will call the manager to assist in assessing suitability.  Anyone who is deemed unable to understand the briefing will be excluded from participation. Instructors are authorizsd to stop the session if participants are misbehaving.  Anyone suspected of being under influence of alcohol or drugs is excluded from participating. Participants must be able to access the tower platforms without the need for being carried. Participants must not carry children or babies in their arms.	Group leaders are responsible for ensuring adequate supervision is provided at all times.  Group leaders must read participant criteria and ensure that all participants within their party are suitable to participate in the activity.  Group Leader to brief students on acceptable behaviour for safety.  All group organisers should undertake their own risk assessment for the visit.	2	3	6

## RISK ASSESSMENT FOR – Gripped Schools Risk Assessments

Fear and Anxiety of participants	3	3	9	Participants  Participants being stuck at height requiring rescue.	Participants are encouraged to practice their technique on the training course to gain confidence in equipment at a low level, to reduce the need to rescue at height.  Rescue procedure in place for participants stuck at a height	Group leaders must read participant criteria and ensure that all participants within their party are suitable to participate in the activity.  Group Leader to brief students on acceptable behaviour for safety.  All group organisers should undertake their own risk assessment for the visit.	2	3	6
----------------------------------	---	---	---	--	--	---	---	---	---

### Net Park

HAZARD	L	S	IRR	WHO MIGHT BE HARMED	CONTROL MEASURES	FURTHER CONTROL MEASURES:	L	S	RR
Participants falling from height.  Participants contravening the safety rules – Climbing safety netting.  Equipment failure Falling at on the entrance ramps	3	4	12	Participants Spectators  Injury to the person falling or impact to spectators underneath the net park.	Participants must be always supervised by their accompanied adults; ratios of adults to children must be adhered to.  Walls are constructed to reduce to reduce the ability for participants to climb minimum of 3m heigh.  Safety Rules are explained during the safety briefing; this includes no climbing on the walls of the park.  Safety Rules are displayed at the entrance to the park.  Net Park is instructor supervised activity; the net park will be locked and secured to prevent unauthorised access when not in operation.	Group leaders must read participant criteria and ensure that all participants within their party are suitable to participate in the activity.  Group Leader to brief students on acceptable behaviour for safety.  All group organisers should undertake their own risk assessment for the visit.	2	3	6

## RISK ASSESSMENT FOR – Gripped Schools Risk Assessments

					Participants not adhering to safety rules will be excluded from using the park.  Instructors have the authority to stop a session if participants are not following the rules.				
Falling objects	3	3	9	Participants Spectators  Participants Sustaining injuries such as cuts, broken bones, bruising, or head injuries if struck by falling objects	Participants should be briefed ahead of the trip that minimal amounts of personal items should be bought to Gripped.  Participants are instructed to leave all loose items on the ground.  The use of mobile phones and cameras while using the net park are prohibited.	Group leaders are responsible for ensuring adequate supervision is provided at all times.  Group Leader to brief students on acceptable behaviour for safety.  All group organisers should undertake their own risk assessment for the visit.	2	3	6
Collisions  Awkward landings  Pre-existing injuries Participants coming downsides	3	3	9	Participants  Injuries such as cuts, broken bones, bruising, or head injuries caused during collision with others or solid objects.	Participants must take part in the mandatory safety briefing before participating; anyone not behaving in an appropriate manner will be removed from the nets.  Participants must be always supervised by their accompanied adults; ratios of adults to children must be adhered to.  Capacity managed to allow adequate space for safe movement.  Only one person permitted on the slides at any one time.  No summersaults or tricks allowed, as written in attraction safety rules	Group leaders are responsible for ensuring adequate supervision is provided at all times.  Group Leader to brief students on acceptable behaviour for safety.  All group organisers should undertake their own risk assessment for the visit.	3	2	6

## RISK ASSESSMENT FOR – Gripped Schools Risk Assessments

Spinal injuries or Broken Bones	3	4	12	<p>Participants</p> <p>Instructors</p> <p>Sustaining spinal or bone injuries. The worsening of these injuries by excessive movement or incorrect handling</p>	<p>Emergency procedure for spinal / bone injuries trained to team.</p> <p>Participants are briefed on emergency procedures; instructors will blow the whistle twice, and participants must stop bouncing, and sit down where they are. If required the instructors will facilitate instructors will direct participants individually to move to the outer edge of the park and make their way out of the park, moving to the edge will reduce the amount of movement.</p> <p>The injured person will be left in situ, support / immobilisation given to the affected part of the body until emergency services arrive.</p> <p>No trick or backflips allowed on the net park</p>	<p>Group leaders are responsible for ensuring adequate supervision is provided at all times.</p> <p>Group Leader to brief students on acceptable behaviour for safety.</p> <p>All group organisers should undertake their own risk assessment for the visit.</p>	2	3	6
Injury from the misbehaviour of participants	3	3	9	<p>Participants</p> <p>Participants Sustaining injuries such as cuts, broken bones, bruising, or head injuries caused during collision with others due to poor behaviour.</p>	<p>Participants must be always supervised by their accompanied adults; ratios of adults to children must be adhered to.</p> <p>The team trained to deal with misbehaving guests. The team trained to stop a session and exclude guests misbehaving or acting dangerously.</p> <p>Guests who appear under the influence of alcohol or drugs are excluded from the attraction.</p> <p>Signs are displayed at the entrance to the Net Park advising guests of the rules.</p> <p>Guests receive a safety brief before being allowed to participate.</p> <p>Anyone seen performing tricks or backflips will be excluded from the activity.</p>	<p>Group leaders are responsible for ensuring adequate supervision is provided at all times.</p> <p>Group Leader to brief students on acceptable behaviour for safety.</p> <p>All group organisers should undertake their own risk assessment for the visit.</p>	2	2	4

### RISK ASSESSMENT FOR – Gripped Schools Risk Assessments

Injuries from the incorrect use of slide	3	4	12	<p>Participant</p> <p>Participants being injured by incorrectly using the slides. Injuries could include an impact with support posts, degloving injuries</p>	<p>The sliding canvas is smooth; slide canvas is inspected as part of documented checks for holes or defects.</p> <p>Participants are instructed to cross their arms when sliding.</p> <p>Guests are given a safety briefing - not to hold on to the netting when using the slide.</p> <p>One person to use the slide at a time.</p> <p>Participants instructed not to have children on their laps when using the slides.</p> <p>Participants are instructed during safety briefing to exit the slide area as soon as possible when at the bottom of the slide. Participants told during the safety briefing check the slide has been cleared by the previous guests prior to sliding</p>	<p>Group leaders are responsible for ensuring adequate supervision is provided at all times.</p> <p>Group Leader to brief students on acceptable behaviour for safety.</p> <p>All group organisers should undertake their own risk assessment for the visit.</p>	2	3	6
Adverse weather conditions	3	3	9	<p>Participants</p> <p>Sustaining an injury due to operating the attraction inappropriate weather conditions</p>	<p>Instructor will monitor weather conditions and make the decision to close the course assessed on the SOP. Participants must follow all instructions always given by the instructors. It may be necessary to close or postpone the activity in some cases</p>		2	3	6

## RISK ASSESSMENT FOR – Gripped Schools Risk Assessments

### Power Fan

HAZARD	L	S	IRR	WHO MIGHT BE HARMED	CONTROL MEASURES	FURTHER CONTROL MEASURES:	L	S	RR
Catastrophic equipment failure resulting in participants falling to the ground	3	5	15	Participants Spectators  Participants or spectators sustaining life changing injuries or death following a falling	<p>Mandatory safety briefing given to all participants before they are allowed to participate in the activity.</p> <p>All equipment is maintained and inspected as per manufacturer instructions. The Powerfan will be withdrawn from use immediately should any doubt arise about its condition for safe use. If doubt arises about the Power Fans operation it will be quarantined until it has been checked by a competent person (external advisors).</p> <p>The Powerfan must only be used by one participant at a time.</p> <p>Participants over the weight of 120kg will not be permitted to participate. Participants will be weighed at the entrance to the attraction. Participants who are under 120kg will be wristbands and allowed to participate. The weight limit will be displayed on the customer waiver form and entrance signs.</p> <p>The PPE that is used as part of the activity is maintained and inspected according to the instructions of the manufacturer, this includes harnesses, lanyards, karabiners, and helmets.</p> <p>Participants will be attached to a fixed lanyard at the top of the tower until they are attached to the Power Fan.</p> <p>Participants will never be detached from a line until they are attached to the Drope</p>		2	5	10

Instructors will carry out <b>CHECK</b> on guests before being put onto the course.</p>	<p>Group Leader to brief students on acceptable behaviour for safety.</p> <p>All group organisers should undertake their own risk assessment for the visit.</p>	<b>2</b>	<b>4</b>	<b>12</b>

## RISK ASSESSMENT FOR – Gripped Schools Risk Assessments

					Safety rules are displayed at the entrance to the course.  Suitable footwear (no - heels, open toes or heels)  Participants must interact with the course as per the briefing and practice course, if participants deviate away from what they have learnt then there is a risk of injury.				
Adverse weather conditions	3	3	9	Participants Sustaining an injury due to operating the attraction inappropriate weather conditions	Instructor will monitor weather conditions and make the decision to close the course assessed on the SOP. Participants must follow all instructions always given by the instructors. It may be necessary to close or postpone the activity in some cases		2	3	6
Slips, trips and falls  On course elements / platforms  Walking up to start the platform.	3	3	9	Participants  Participants sustaining injuries such as bruising or broken bones following a slip, trip or fall	Participants will be wearing harnesses so the impact should be lessened.  Participants will be wearing tight-fitting shoes that cannot fall off. The instructors will be wearing shoes with non-slip soles.  Start platform has handrails and non-slip treads on the stairs. Participants must walk up the entrance / exit stairs and hold on to the handrail at all times.	Group Leader to brief students on acceptable behaviour for safety.  All group organisers should undertake their own risk assessment for the visit.	2	3	6

### RISK ASSESSMENT FOR – Grippled Schools Risk Assessments

Insects and risk of insect bites or reactions  Wasp/nests and the Oak Processionary Moth	3	3	9	Participants  Participants being bitten of stung or reacting following contact with Oak Processionary Moth	Regular monitoring of the course to identify any pest problems; pest control will be called to deal with any issues.  The team are trained to identify Oak Processionary Moth caterpillars; assistance will be sort from an external pest control company to confirm species as there are a number of species which look similar. The team is trained to report to their manager any potential sightings.		2	3	6
Disagreement on participant suitability	3	3	9	Participants  Sustaining injuries due to not being able to understand the safety requirement for the attraction.	Participants must be always supervised by their accompanied adults, ratios of adults to children must be adhered to.  Guests with additional needs must be able to understand the instructor's safety briefing; if there is any doubt about suitability to participate, the instructor will call the manager to assist in assessing suitability.  Anyone who is deemed unable to understand the briefing will be excluded from participation. Instructors are authorised to stop the session if participants are misbehaving.  Anyone suspected of being under influence of alcohol or drugs is excluded from participating.  Participants must be able to access the tower platforms without the need for being carried. Participants must not carry children or babies in their arms.	Group leaders must read participant criteria and ensure that all participants within their party are suitable to participate in the activity.  Group Leader to brief students on acceptable behaviour for safety.  All group organisers should undertake their own risk assessment for the visit.	2	3	6

## RISK ASSESSMENT FOR – Gripped Schools Risk Assessments

Fear and Anxiety of participants	3	3	9	Participants  Participants being stuck at height requiring rescue.	Participants are encouraged to practice their technique on the training course to gain confidence in equipment at a low level, to reduce the need to rescue at height.  Rescue procedure in place for participants stuck at a height	Group Leader to brief students on acceptable behaviour for safety.  All group organisers should undertake their own risk assessment for the visit.	2	3	6
The participant failing to land correctly, resulting in an impact with the attraction structure.  Participants turning during the Zip, Meaning they are unable to land correctly	3	3	9	Participants  Participants sustaining cuts, bruises or broken bones due to incorrect landing and impacting the structure	Participants must attend a mandatory safety briefing and be able to demonstrate on the practice course the correct landing technique consistently.  Guests are only permitted three attempts to deliver safe, consistent landings on the practice course  Bumper mats are selectively installed in specific locations where particular risks are identified.  Guests are taught the techniques to self-recover during the briefing and observation  Guests are fitted with the correct Personal Protective Equipment based on their height.  Helmets are mandatory for this attraction.		2	3	6
